

## Dialogues in Science and Faith

### Talk 6

**Title: Reflections on Science and Faith:  
connecting origin of life and the origin of universe**

**Speaker: Prof Stephen TSUI**

School of Biomedical Sciences, The Chinese University of Hong Kong

Stephen Kwok-Wing Tsui is currently a Professor in the School of Biomedical Sciences, the Head of Division of Genomics and Bioinformatics and the Director of Hong Kong Bioinformatics Centre of CUHK. Having taught in a secondary school for six years, he quit his job in 1992 to study for an MPhil at CUHK. After receiving his PhD in biochemistry at CUHK, he was appointed as an Assistant Professor and then Full Professor in Biochemistry. He is a former member of the International HapMap Consortium and worked on the single nucleotide polymorphisms of human chromosome 3p. During the SARS outbreak in 2003, his was one of the first teams to crack the complete genome of the SARS-coronavirus.
