

Proposal

Follow-up work for completion after Redeeming Technology Session 4. To be submitted by 18th May 2018

Think of something that has caught your attention during the Redeeming Technology series which you think might be worth digging into deeper. Make me a proposal.

Project summary

Summarise your idea for a project that would dig deeper into issues raised in Redeeming Technology. (Keep it brief. Less than 200 words.)

Project Aims

What is the purpose of your project? What is/are the core question(s) which it seeks to answer? Are there particular problems it seeks to solve?

Project activities

What would you do to accomplish the aims described above? Be specific, not general.

Anticipated outcomes

If you were to accomplish the aims of your project, what difference would it make? Who would be affected by those differences?

People involved

Who would be in your dream team? What disciplinary backgrounds would they need to have? Do you have any named individuals in mind?

Budget

What would you want to spend money on, and how much would you want to spend?

Funding sources

Who might be willing to fund something like this? (See list below if you are lacking inspiration.)

- Please submit this to Katy Mok (kytmok@hku.hk) by **Friday 18th May 2018**.

If you can get GRF money for projects to Redeem Technology, well done. If not, here are some other organisations (in no particular order) that you might want to look in to.
