Homework Questions

Follow-up work for completion after Session 2.
To be submitted by 8th February 2019

[**Pro tip:** Use this as a discussion starter with family over Chinese New Year!]

Suggest a disruptive technology that may cause significant change to –

- Business or industry structure,

- Cultural values,

- Social power distribution,

- Human relationships,

- Community development,

- Our concept of time and space,

- Our valuation of product or service benefits.

For one of the above areas, consider –
- What changes would the stated technology bring about?
- How would it bring those changes about?
- What would be the consequences of these changes?
- How might we evaluate these changes from a Christian perspective?

Please submit your thoughts to mikeb@hku.hk by **8th February 2019**.
We will compile people's thoughts and feed them into discussions in subsequent sessions.
