

## **Homework Questions**

### **Follow-up work for completion after Session 4. To be submitted by 19<sup>th</sup> April 2019**

Consider the following questions and jot down some notes while ideas are fresh in your memory.

- 1)** What measures might helpfully be used to shed light on social progress? (This may include measures raised during the session, or others that you think of.)
  
- 2)** What aspects of social progress are not quantitative or quantifiable? What effect does the use of (and focus on) quantitative measures have on these aspects of social progress, and on social progress as a whole?
  
- 3)** From a Christian perspective, are there any aspects of “social progress” itself, as a concept of a frame, which are problematic? What are they? Why are they problematic? Can you suggest a better frame?

Please submit your thoughts to [mikeb@hku.hk](mailto:mikeb@hku.hk) by **19<sup>th</sup> April 2019**.

We will compile people’s thoughts and feed them into discussions in subsequent sessions.
